10	3	Intensification	4	1	Push toward PRs
11	3	Peak	4	1→0*	Anchors 4-8 reps, last set @ RIR 0
12	3	DELOAD	2-3	4	Celebrate progress, recover

VOLUME RULES

- **Anchors** ■: 3-4 sets — these are your primary overload drivers
- **Accessories**: 2-3 sets — support growth without crushing recovery
- **Peak Week**: Only the LAST set of anchors goes to 0 RIR, others stay at 1-2
- **Deload Weeks**: NO FAILURE — keep RIR ≥4, reduce volume, focus on recovery

REP RANGES

- **Compounds** (Press, Row, Squat, Deadlift): 6-10 reps, 2-3 min rest
- **Isolation** (Curls, Extensions, Raises, Kickbacks): 10-15 reps, 60-90 sec rest
- ■ = Anchor lift (keep consistent for progressive overload)

■ HOW TO PROGRESS (Anchors)

- When you hit the **top of the rep range** on all sets at the target RIR, **increase weight next week** (smallest jump available).
- If you miss the rep range, keep the same weight and try again next week.
- Example: Chest Press @ 50 lbs for 3x10 (hit all reps) → Next week: try 55 lbs for 3x6-10.

■ CARDIO PROGRESSION

- **Block 1**: Foundation — 10-12 min steady state (Zone 2) after 2 sessions/week
- **Block 2**: Accumulation — 15-18 min steady state, introduce light intervals 1x/week
- **Block 3**: Intensification — 18-20 min, harder intervals + steady state options
- **Deload Weeks**: Light 10-15 min walk only — this is recovery, not training
- **Zone 2** = Conversational pace (can talk while moving)

■ **CONDITIONING FINISHERS**

- **Starting Week 2:** Short 2-3 round circuits after select workouts
- **Purpose:** Elevate heart rate, burn extra calories, build work capacity
- **Intensity:** Use light-moderate weights, focus on movement quality
- **Skip if:** Feeling overly fatigued or short on time — lifting is priority
